

Aviation Instructional Techniques for Flight Crew, Cabin Crew and Dispatchers – 5 Days

INTRODUCTION

Within the Flight Crew, Cabin Crew and Dispatcher Training Environment we have a regulatory and organizational obligation to share processes and procedures in the most effective way.

The Aviation Instructional Technique program should be adapted to reflect the culture of your flight operation. It is conducted in a classroom environment and practical exercises in instructional technique, analysing communication problems, and instances or examples of common challenges in teaching and learning.

Whenever possible, initial instructor training should be conducted in a group situation away from the pressures of the normal working environment so that participants can interact and communicate freely.

The course is highly participative and stimulates involvement and provides for powerful motivation. It introduces the delegate to practical training skills and provide the confidence that can be developed to improve the safety of the flight operations within your organizations.

This course is particularly relevant for experienced captains aspiring to training captain status with no previous instructor qualification or experience.
