

## ATO COMPLIANCE MONITORING SYSTEM TRAINING COURSE

### INTRODUCTION

The introduction of Regulation (EU) 1178/2011 saw the requirements of Compliance Monitoring introduced in lieu of Quality Systems for FTOs and TRTOs. It also saw the introduction of Compliance Monitoring for Registered Facilities.

This course was developed to be equally relevant for those ATOs for whom Compliance Monitoring and Quality Systems are new concepts and those for whom the new requirements are simply a transition from their existing systems. This course was also designed to give delegates sufficient theoretical auditor training for them to then continue on to an in-company auditor training programme.

### Detailed Content / Topics - The following Subjects will be addressed

The following items are addressed, covering the regulatory requirements:

- Requirements of Compliance Monitoring Systems in Annex III to Regulation (EC) 216/2008
- Requirements of Compliance Monitoring Systems in ORA.GEN
- Related Acceptable Means of Compliance and Guidance Materials
- Compliance Monitoring Programmes for ATOs
- Audits and Inspections
- Size Nature and Complexity of the Activity
- Requirements when Contracting Activities

In addition, the course also includes Basic Auditor Training upon completion of which, delegates will be fully prepared to commence on-job auditor training within an ATO.

### Target groups

This course is intended for anyone who is involved in the implementation, running or ongoing management of a Compliance Monitoring System within an ATO. This course is also intended for anyone wishing to undertake the role of an auditor within an ATO. It may also be suitable for any other individuals connected with an ATO who wish to expand their knowledge of the functioning of aviation systems (the Compliance Monitoring System basic requirements are similar in most spheres of European Aviation)

## Pre-requisites

It is beneficial for participants to have at least a basic understanding of the principles behind ATO management systems although this is not essential. For those without a basic knowledge of ATO management systems, this course is an ideal follow-on to the EASA Consultants EU Aircrew Regulation Training Course and may be combined with that course to give participants all the information they require for entry onto this course.

## Learning Objectives

Upon completion of this course, it is anticipated that participants with average aptitude will be competent to undertake a role in the management and/or audit function of a Compliance Monitoring System within an ATO (as specific to their role within the ATO).

## Duration

This course runs for 2 days when combined with an EU Aircrew Regulation Training Course or 3 days as a stand-alone course. Course commences at 09:00 and ends 17:00 with lunch break of 1 hour and coffee breaks in the morning and afternoon.

Timings may be adjusted as agreed on the day, between instructor and participants.
