Root Cause Analysis for Quality Assurance Practitioners

The purpose of this training is to identify best practice techniques and behaviours to support the delivery of effective audits. The delegate will consider practices to determine the root causes of identified issues.

Aviation Compliance Auditing in an EASA Environment

This course delivers a comprehensive understanding of all elements of an Aviation Compliance led Quality Management System (QMS). Organizations which can deliver the most effective quality audit system, together with an efficient process to follow up with all identified issues in a practical way, can excel in the delivery of their core products and services.

Managing organizational competence in a 145 environment

This training supports an understanding of the best practice techniques to deliver effective Competence Management and control within your organisation, as well as an effective understanding regarding the challenges to implement effective Competence Management and Assessment processes within your organisations.
