## Republic of The Philippines CAR PART 5 Airworthiness Essentials - 1 Day

### INTRODUCTION

The Republic of the Philippines Civil Aviation Regulations (CAR) Part 5 presents regulatory requirements for the airworthiness of aircraft expected to operate in the Republic of the Philippines using the standards and recommended practices in ICAO Annexes 6 and 8.

Part 5 is designed to address the complex situation faced by most countries today respecting the airworthiness of aircraft operating within the country and in international aviation.

In most such cases, there are aircraft registered in the Republic of the Philippines that were designed and manufactured in another Contracting State, and aircraft registered in the Republic of the Philippines that were designed in one Contracting State and manufactured in another Contracting State.

In addition, the Republic of the Philippines may have Air Operator Certificate (AOC) holders who operate aircraft registered in another Contracting State, with different states of design and manufacture. Additionally, the Republic of the Philippines may have AOC holders who are part of a regional consortium, with maintenance facilities in a neighboring country. Proper airworthiness of aircraft registered in the Republic of the Philippines is the result of communication between all parties.

This training provides for aircraft and aeronautical products, an overview of certification requirements, issuance of a Certificate of Airworthiness, continued airworthiness, rebuilding and modifications, maintenance and preventive maintenance; aircraft inspection requirements, and air operator aircraft maintenance and inspection requirements.

TRAINING COURSE DETAILS

## What is the Benefit of this Training - What will I learn?

- a) Awareness of the structure, composition, and impact of the Republic of the Philippines CAR Part 5.
- b) Understanding organizational roles and responsibilities in compliance to CAR Part 5 Airworthiness.
- c) Understand the environment driving the CAR Part 5 Airworthiness process to focus your business decision-making process.
- d) Understanding the concepts of airworthiness, and its importance to ensure safety of flight.
- e) Confidence in gaining a detailed knowledge of the key elements of CAR Part 5 Airworthiness.
- f) Have an in-depth understanding of the interface between CAR Part 5 Airworthiness and Part 6 AMO roles, responsibilities, and obligations.
- g) Be able to demonstrate compliance with CAR Part 5 Airworthiness to avoid or mitigate problems.

## Why Should I choose SAS for the training?

Sofema Aviation Services is a Regulatory training and consulting company with 45 years commercial aviation experience and 10 years operational experience. Since we started, we have provided certificates to approximately 15,000 delegates. We have grown for 2 primary reasons!

The first is that we are professional, and we listen to our customers. Please visit our download area as an example of how we engage with our customers  
<https://sassofia.com/download-area/>

The second is not only the fact that our prices are far more cost effective than our competitors, it is that our discount program leaves all the others way behind – please do not take our word for it, check it out!

## What Makes SAS Republic of The Philippines CAR PART 5 Airworthiness Essentials - 1 Day Training Different?

Because our courses are written by experts who have managed Republic of the Philippines CAA Approved Maintenance Organizations responsible for airworthiness in an operations capacity, and in a Quality & Safety role. This allows the instructor to draw on his knowledge and relate to his experiences to deliver an effective training session beneficial for the delegates.

At Sofema Aviation Services our focus is on accepting that compliance with Civil Aviation Regulations is in fact minimum compliance. Interpreting the regulations in a way which enables the development and optimization of the business is where we should see opportunities to drive efficiencies, and cost savings.

### Detailed Content / Topics - The following Subjects will be addressed

- Terms and Definitions
- General
- Aircraft and Component Original Certification
