

Aerodrome Certification & Regulatory Obligations – ICAO – 5 Days

INTRODUCTION

With the continuous growth in traffic airports need to be flexible, scalable and accommodating to facilitate development and to cope with organic growth.

It is necessary for Aerodromes to have in place all necessary infrastructure to ensure efficient operations of all airport business processes and systems whilst delivering safety and security to the highest possible levels.

Based on compliance with ICAO Annex 14 – relating to the Certification and Oversight of Aerodromes, the course focuses on the Fundamental Requirements and Administrative Procedures related to management development and oversight of Aerodromes.

Considering the oversight processes required related for both initial certification as well as ongoing oversight and focusing on both Management Techniques to ensure effective Quality Control as well as independent Quality Assurance.

The Course leans heavily on the need to ensure a risk-based approach to certification management and includes oversight activities and addresses the process whereby we will develop an integrated management system and supports a detailed understanding of the various challenges and solutions available.

Numerous examples are drawn to illustrate best practice.

It is necessary for stakeholders and other leaders to develop measurable strategic objectives and the effective aerodrome planning requires attention to detail, together with a deep understanding of the daily obligations including the various challenges whilst maintaining focus on medium and long-term objectives.

What is the Benefit of this Training -What will I learn?

- a) Achieve a comprehensive understanding of the regulatory requirement for the development and management of Aerodromes
- b) Familiarity with the steps required to achieve airport certification
- c) Understanding the principles of an ICAO Annex 14 & ISO 19011 compliant management including delivering and effective Quality Management System (QMS) and Safety Management System (SMS)
- d) Achieve a detailed understanding regarding the development, management and oversight of the Aerodrome Manual and related process and procedures
- e) Develop an understanding regarding how to Identify areas which need special attention and how to apply risk-based techniques to ensure the correct focus together with appropriate mitigations
- f) To be able to deliver an effect assessment to establish Aerodrome Compliance plus the effectiveness of the Quality & Safety System

Who is the course for

Airport Managers, Nominated Persons, Regulatory Authority Personnel, Quality & Safety Practitioners and other stakeholders.

Why Should I choose SAS for the training?

Sofema Aviation Services a Regulatory training and consulting company with 45 years commercial aviation experience and 10 years operational experience. Since we started we have provided certificates to approx 15,000 delegates we have grown for 2 primary reasons!

The first is that we are professional and we listen to our customers. Please visit our download area as an example of how we engage with our customer <https://sassofia.com/download-area/> .

The second is not only the fact that our prices are far more cost effective than our competitors it is that our discount program leaves all the others way behind – please do not take our word for it check it out! <https://sassofia.com/sas-customer-benefits/sas-discount-program/>

What Makes Aerodrome Certification & Regulatory Obligations - ICAO - 5 Days Training Different?

Because our courses are written by people who have spent many years fully engaged within the Aviation System we are very familiar with the potential risk areas, as well as challenges and opportunities to develop effective working practices.

At Sofema Aviation Services our focus is on accepting that compliance with EASA Regulations and other Industry led compliance requirement's is in fact minimum compliance.

We are specialised in Interpreting the regulations in a way which enables the development and optimization of our business. Our goal is to help our clients seek opportunities to drive efficiency and cost saving.

Detailed Content / Topics - The following Subjects will be addressed

- Contents
- Introduction
- Definitions & Terms
- Introducing ICAO Annex 14 Volume I Aerodrome Design and Operations
