## Aviation Security Awareness – ½ Day

### INTRODUCTION

This Half day Course available either in the classroom or online provides a general introduction to the role of AVSEC (Aviation Security) within the Aviation System

The Aviation Industry is an attractive target for terrorist and criminals and all staff working in the industry need to be well aware of different threats and how we can play a role to either support prevention or to know how to react in case of a security incident.

Whilst there are designated staff and managers which take care of aviation security. Security is the responsibility of everybody and the more people who are involved in this process, the better is our chance of preventing incidents.

Security awareness training remains the best way to ensure people are aware of the threats and risks.

## Why Should I choose SAS for the training?

Sofema Aviation Services a Regulatory training and consulting company with 45 years commercial aviation experience and 10 years operational experience. Since we started we have provided certificates to approx 15,000 delegates we have grown for 2 primary reasons!

The first is that we are professional and we listen to our customers. Please visit our [download area](#) as an example of how we engage with our customer.

The second is not only the fact that our prices are far more cost effective than our competitors it is that our discount program leaves all the others way behind – please do not take our word for it [check it out!](#)

## What Makes SAS Aviation Security Awareness - ½ Day Different?

Because our courses are written by people who have lived through the regulations. The author of the training material has more than 25 years' experience as an auditor across the entire regulatory spectrum.

At Sofema Aviation Services our focus is on accepting that compliance with Regulations is in fact minimum compliance. Interpreting the regulations in a way which enables the development and optimisation of our business is where we should see opportunity to drive efficiencies and cost saving.
