

EASA 145 Production Planning Essentials for Part M CAMO Group – 1 Day

INTRODUCTION

Whilst the responsibility for delivery of an effective Maintenance Planning process falls on the Operator the delivery of an effective Production Planning function sits firmly with the EASA Part 145 Organization.

This course considers the oversight and interface responsibilities of the CAMO Group to ensure effective control of Maintenance Delivery by the Aircraft Maintenance Organisation (AMO)

Production Planning Duties includes the general oversight of the facilities, general work preparation, responsive to environmental conditions, inventory control. subcontract Co-ordination, planning of safety critical tasks, managing hangar availability, man hours estimation and availability and the control of approved data.

The need for successful reporting at the beginning and throughout the maintenance check should be considered as a requirement of the highest order.

The importance of Managing Competencies is considered as well as understanding the Quality Control Process in Production Planning.

Who is the training for?

This 1 day intensive course is specifically designed for persons working in a Continuous Airworthiness Management Environment (CAMO) with a direct involvement in the oversight of Part 145 Planning functions.

It will also be of benefit to Quality Audit Staff and persons who normally work within the Part M CAMO environment. This Training introduces the delegate to the basics of the EASA 145 Production Planning Process and considers the elements which are involved to deliver an effective Production Planning System.
