

Fire Safety Training – ½ Day

Introduction

Understanding simple rules can help us to do the right thing when we are faced with a Fire Emergency.

Ensuring Fire safety means understanding the set of practices which are intended to reduce the exposure to the risk of Fire under any circumstances.

Fire safety measures include all activities and behaviours which are intended to prevent the possibility of an uncontrolled fire.

Threats to fire safety are commonly referred to as fire hazards.

A fire hazard may include a situation that increases the likelihood of a fire or may impede escape in the event a fire occurs.

Who is the Course for?

Essentially it is for every employee who is working in the facility either as staff or contractor

New Starters should complete this training before working alone.

All Employees should repeat this training as a recurrent at least every 24 months (12 months is better)

What is the Benefit of this Training - What will I learn?

After attending the training, you will be able to :

- a) Identify Hazards - Combustible and Combustible Materials, Electrical Issues, Machines and Equipment, Hot work
- b) Deliver an Effective Fire Safety Risk Assessment
- c) Determine the potential consequences
- d) Apply Rules for Fighting Fires

Why Should I choose SAS for the training?

Sofema Aviation Services a Regulatory training and consulting company with 45 years commercial aviation experience and 10 years operational experience. Since we started we have provided certificates to approx 15,000 delegates we have grown for 2 primary reasons!

The first is that we are professional and we listen to our customers. Please visit our [download area](#) as an example of how we engage with our customer. The second is not only the fact that our prices are far more cost effective than our competitors it is that our discount program leaves all the others way behind – please do not take our word for it check it out! [SAS Discount Program](#)

What Makes SAS Fire Safety Training - ½ Day different?

Because our courses are written by people who have lived through the regulations, from the introduction in the early 00's. EASA Part M is an essential regulation related to the management of the aircraft.

At Sofema Aviation Services our focus is on accepting that compliance with EASA Regulations is in fact minimum compliance. Interpreting the regulations in a way which enables the development and optimization of our business is where we should see opportunity to drive efficiency and cost saving.
