Aviation Regulatory Experts

SMS Implementation and Risk Assessment Review – 1 Day

Introduction

Safety Management should be about more than just protecting your organisation against undesired safety outcomes it may also add value by supporting optimization of organisational process which drive efficiency and managed correctly lead to financial savings.

SMS differs from other mandated systems. Why? - Because SMS is a performance based system, as such it is driven by internally set organisational criteria, whilst this will be challenging for the regulator to audit, the whole point is the recognition it is an organisational system. The needs of the organisation should in actual fact exceed the obligations to comply with any set of regulations.

Are you able to develop real and meaningful performance metrics? It is through such "Deep & Effective" measurement techniques and processes which enable us to demonstrate our internal and external assurance regarding our Safety exposure.

SofemaAviation Services has been supporting, training and implementing SMS for many years. We are able to work both at operational and strategic levels.

All of our training courses focus on 3 basic elements:

The first is the full "Buy In" to understand the relevance and importance of SMS within the organisation.

The second element focuses on the need to develop an organisational system which complies with the regulation, and not to simply develop a system for the regulations.

The third and possibly of the most significant is an understanding of organisational culture and behaviours.

Our knowledge based on over 40 years commercial aviation experience provides the most practical solutions to the challenges faced in implementing truly effective SMS system.

TRAINING COURSE DETAILS

Who is the course for?

The participation in the course would be extremely beneficial for the company's Accountable Managers, as well as their Directors, Managers and Stakeholders.

What is the Benefit of this Training - What will I learn?

- a) A practical assessment of the status of your SMS Implementation, with focus on gap analysis, measurement of current status and practical implementation challenges, including the identification and management of hazards.
- b) A full understanding of the current position, identifies the organization focus and considers a road map and time line to achieve the stated objectives.
- c) Build this understanding into a range of opportunities which may be used to take the organization forward, by delivering outcomes, identifying roles and responsibilities and agreed timelines.
- d) Understand effective methods of identifying and controlling risk, which is an essential element of safety management.

Why should I choose SAS for this training?

Sofema Aviation Services is a Regulatory Training and Consulting company with 45 years of commercial aviation experience and 10 years operational experience.

Since the start we have provided certificates to approx 20,000 delegates and we have grown for 2 primary reasons!

The first is that we are professional and we listen to our customers. The second reason is a combination of outstanding course fees, together with a world beating discount program which leaves our competitors way behind – please do not take our word for it, [check it out!](#)
