

ETOPS (Extended Operations) or EDTO (Extended Diversion Time Operations) – Includes Customer AC (A320) – 2 Days

Introduction

ICAO Requirements for Extended Range Twin-engine Operations (ETOPS) have been in place since 1985, when they were introduced to apply an overall level of operational safety for twin-engined aeroplanes which was consistent with that of the modern three and four-engined aeroplanes then flying, to which no restrictions were applied. The course has been specifically designed to provide personnel with a thorough overview of ETOPS fundamentals, focusing on key topics and concepts.

This course is split into 2 days with the first day focused on technical aspects and the second day focused on the practical implementation within the organisations own processes related to Airbus A320

EDTO, ETOPS and LROPS

ICAO Annex 6 Part 1 under Amendment 36. This introduced the Extended Diversion Time Operations (EDTO) regime in place of ETOPS. However since then, although the EDTO regime has been widely accepted, the term EDTO has not been universally adopted the continued use of ETOPS is explicitly allowed for in Annex 6 provided that EDTO concepts “are correctly embodied in the concerned regulation or documentation”. Given this flexibility, the term ‘ETOPS’ has been retained by the FAA and others by redefining it as an abbreviation for ‘ExTended range OPERations’ rather than as previously ‘Extended range Twin Operations’. EASA currently continues to use ETOPS as originally defined and the abbreviation ‘LROPS’ (Long Range OperationS) for extended range operation by three and four-engined aircraft.and Quality Personnel.

Who is this course for?

Regulatory Authority Members, Flight Safety Department Managers and Inspectors with operational oversight responsibilities.Operations Accountable Managers and proposed Nominated Persons (NP) Flight OPS, Maintenance Planning (CAMO) and Maintenance OPS (145), Crew Training and Ground Ops, Compliance Monitoring Managers (Quality Managers) and Auditors, Safety Managers, Flight Safety Officers, Flight Operations Officers and Cabin Crew Management.

What is the Benefit of this Training – What will I learn?

- a) Understand the regulatory requirements to control and manage all ETOPS certification & maintenance related elements
- b) Be able to Implement Quality Control Process and Procedures related to ETOPS & Maintenance OPS
- c) Understand the requirements related to Quality & Safety organisational obligations including Quality Assurance (QA) & Quality Control (QC)
- d) Communicate ETOPS requirements and Motivate staff to ensure effective ETOPS system performance

Why Should I choose SAS for the training?

Sofema Aviation Services is a Regulatory Training and Consulting company with 45 years of commercial aviation experience and 10 years operational experience. Since the start we have provided certificates to approx 20,000 delegates and we have grown for 2 primary reasons!

The first is that we are professional and we listen to our customers.

The second reason is a combination of outstanding course fees, together with a world beating discount program which leaves our competitors way behind - please do not take our word for it, [check it out!](#)

What Makes SAS ETOPS (Extended Operations) or EDTO (Extended Diversion Time Operations) Training Different?

Because our courses are written by people who have lived through the regulations. The author of the training material has more than 25 years' experience as an auditor across the entire regulatory spectrum.

At Sofema Aviation Services our focus is on accepting that compliance with Regulations is in fact minimum compliance. Interpreting the regulations in a way which enables the development and optimisation of our business is where we should see opportunity to drive efficiencies and cost saving.
