

EASA Part – 66 – Essentials – 1 Day

Introduction

EASA Part-66 is a common European aircraft maintenance licence recognized in all EASA member states. The regulations define the conditions under which a maintenance engineer is authorized to release an aircraft into service after a maintenance operation.

On the basis of the Maintenance Engineers Licence, together with satisfactory demonstration of competency and knowledge of organizational procedures the personal authorization document is issued by an approved Part-145 organization.

The conditions required are defined by minimum education requirements (school and college certificates, language competency, etc) as well as type rating qualifications for therelevantaircraft or particular tasks. This one-day course provides delegates with an insight into the requirements of the regulation. Whilst the course is aimed specifically at, stakeholders as well those with limited Part 66 knowledge, who never the less require a fundamental understanding of their obligations and responsibilities.

On completion delegates shall understand and be able to explain the basic license structure together with the various categories A, B1, B2, B3 & C, how organisations can ensure that they understand and manage the process in the most effective way.

Why Should I choose SAS for the training?

Sofema Aviation Services is a Regulatory Training and Consulting company with 45 years of commercial aviation experience and 10 years operational experience. Since the start we have provided certificates to approx 25,000 delegates and we have grown for 2 primary reasons!

The first is that we are professional and we listen to our customers.

The second reason is a combination of outstanding course fees, together with a world beating discount program which leaves our competitors way behind – please do not take our word for it, [check it out!](#)
