

# Train The Trainer Electrical Wiring Interconnect System (EWIS) – 1 1/2 Days

## Introduction

The origins of the requirement for EWIS Training go back to a number of incidents which have had a catastrophic effect on the industry with instances of in-flight smoke and fire events in which contaminants were ignited by electrical faults which allowed a fire to be sustained and spread. Considerable research was conducted by The FAA and the National Transportation Safety Board (NTSB) together with the European Stake holders.

The outcomes were conclusive and determined the specific need for EWIS Training.

This course aims to provide a comprehensive understanding of the requirement for effective EWIS Training and provides a thorough grounding in effective techniques to enable your nominated EWIS trainer to deliver appropriate training within your organization.

The course is highly practical, and promotes best training practices. It also recognizes that while much commonality exists in these two subjects, EWIS training for groups 1 & 2 is very specific and relevant to the company fleet. It is an industry specific two-day program specifically designed for those who need to manage, or deliver FTS and or EWIS Training.

Electrical Wiring Interconnect System EWIS Training was issued as an EASA requirement in the summer of 2008. There is much confusion across industry as to the requirements to comply with the need for training EWIS within the Part 145 and Part M environment. AMC 20-22 makes it very clear as to the requirements which are to be complied with to ensure the organisation remains in conformity with EASA regulatory requirements. Ultimately in accordance with the terms of the approval issued to Operators and MRO's It is the Operators and Maintenance Organisation Responsibility to comply with the requirements of Electrical Wiring Interconnect Systems working practices and procedures including specifically EWIS training.

The course is a highly participative and stimulates involvement and provides for powerful motivation. To introduce the delegate to training skills and to provide the confidence which can be developed to deliver effective EWIS Training within your organizations.

This course is a Train the Trainer course it is not a replacement for the requirement for EWIS training rather it is intended to prepare the Trainer for training within their own organizations.

Attendees will have an opportunity to purchase a license to permit in company trainings of the following courses.

- SAS Fuel Tank Safety 1 Day Phase 2
- SAS EWIS for groups 3 to 8 1 Day
- SAS EWIS for groups 1 & 2 3 Days

## Who is this course for?

The course is primarily focused on the needs of the EASA Part 145 and EASA Part 147 Instructors to be compliant with the obligation to develop and deliver In-Company EWIS Training Courses. The course will also be of interest to persons who are interested in becoming Aviation Technical Instructors (Both EASA Part 147 and EASA Part 145) or wishing to hone existing skills.

- h) Consider group learning and collaborative learning techniques.

## Why Should I choose SAS for the training?

Sofema Aviation Services is a Regulatory Training and Consulting company with 45 years of commercial aviation experience and 10 years operational experience. Since the start we have provided certificates to approx 25,000 delegates and we have grown for 2 primary reasons!

The first is that we are professional and we listen to our customers.

The second reason is a combination of outstanding course fees, together with a world beating discount program which leaves our competitors way behind – please do not take our word for it, [check it out!](#)

## What Makes SAS Train the Trainer Fuel Tank Safety (FTS) – 1 1/2 Days Different?

Because our courses are written by people who have lived through the regulations. The author of the training material has more than 25 years' experience as an auditor across the entire regulatory spectrum.

At Sofema Aviation Services our focus is on accepting that compliance with Regulations is in fact minimum compliance. Interpreting the regulations in a way which enables the development and optimisation of our business is where we should see opportunity to drive efficiencies and cost saving.
