

AOC Compliance Monitoring System Training Course – 4 Days

Introduction

The introduction of Regulation (EU) 965/2012 saw the requirements of Compliance Monitoring introduced in lieu of Quality Systems for AOCs. It also saw the introduction of Compliance Monitoring for the Operators for whom it may have previously not been required.

A fully integrated (Into the management system) Compliance Monitoring program within an EASA approved organisation is able to deliver far more than simple identification of non-compliances.

It should ideally provide significant benefits to support the business by underpinning the Safety Management System (SMS).

This course was developed to be equally relevant for those Operators for whom Compliance Monitoring and Quality Systems are new concepts and those for whom the new requirements are simply a transition from their existing systems. This course was also designed to give delegates sufficient theoretical auditor training for them to then continue on to an in-company auditor training programme.

The course looks in detail at maximising the effectiveness of the EASA Management System Approach and to ensure the strongest possible Compliance Monitoring and reporting function.

The course also deals with effective auditing of the AOC Part M Continuing Airworthiness Management Organisation (CAMO) and the Approved Training Organisation (ATO).

The Course is specifically focused to meet the needs of Compliance Auditing staff from both the AOC and CAMO business areas.

Why Should I Choose SAS for the training?

Sofema Aviation Services a Regulatory training and consulting company with 45 years of commercial aviation experience and 12 years of operational experience. Since we started we have provided certificates to approx 25,000 delegates we have grown for 2 primary reasons!

The first is that we are professional and we listen to our customers. Please visit our download area as an example of how we engage with our customer.

The second is not only the fact that our prices are far more cost-effective than our competitors it is that our discount program leaves all the others way behind – please do not take our word for it [check it out!](#)

What Makes SAS AOC Compliance Monitoring System Training Course – 4 Days Different?

Because our courses are written by people who have lived through the regulations. The author of the training material has more than 25 years' experience as an auditor across the entire regulatory spectrum.

At Sofema Aviation Services our focus is on accepting that compliance with Regulations is in fact minimum compliance. Interpreting the regulations in a way which enables the development and optimisation of our business is where we should see opportunity to drive efficiencies and cost saving.

Target groups

This course is intended for anyone who is involved in the implementation, running or ongoing management of a Compliance Monitoring System within an AOC or other Operator. This course is also intended for anyone wishing to undertake the role of an auditor within such an Operator organisation. It may also be suitable for any other individuals connected with air operations who wish to expand their knowledge of the functioning of aviation systems (the Compliance Monitoring System basic requirements are similar in most spheres of European Aviation).

Pre-requisites

It is beneficial for participants to have at least a basic understanding of the principles behind Operator management systems although this is not essential.

Learning Objectives

Upon completion of this course, it is anticipated that participants with average aptitude will be competent to undertake a role in the management and/or audit function of a Compliance Monitoring System within an air Operator (as specific to their role within that organisation).
