

Compliance Monitoring for Ground Operations and Ground Handling – 3 Days

Introduction

The Role of Ground Operations & Ground Handling, Compliance Monitoring & Auditing is an important role involving many of the following tasks –

- Third Party supplier audits of contracted Ground Handling providers, including audit reporting and follow-up
- Administering the completion of the Ground Operations compliance monitoring plan
- Managing the Ground Operations audits and compliance monitoring inspection audit plan.
- Close cooperation with Ground Operations department, including regular meetings and tracking of outstanding findings
- Active engagement with compliance related projects
- A fully integrated Compliance Monitoring is able to deliver far more than simple identification of non-compliances.

This course was developed to be equally relevant for those Operators for whom Compliance Monitoring and Quality Systems are new concepts and those for whom the new requirements are simply a transition from their existing systems. This course was also designed to give delegates sufficient theoretical auditor training for them to then continue on to an in-company auditor training programme.

The course looks in detail at maximising the effectiveness and to ensure the strongest possible Compliance Monitoring and reporting function.

The course also deals with effective auditing of the Ground Operations and Ground Handling Environment

Who is the Course for?

The course is designed for persons who need to manage Ground OPS and Ground Handling Audit Programs. IT is also appropriate for any person who is choosing to develop auditing competence in a ground handling environment

What is the Benefit of this Training – What will I learn?

- a) To be able to explain the key elements required to manage the organisations Ground Operations & Ground Handling Quality Assurance System processes to both ensure compliance and to deliver maximum effectiveness.
- b) Understand the regulations which drive Quality Audit Requirements
- c) To consider in depth Compliance Management Auditing and to raise an understanding of the various roles of a quality system within the organisation

What is the Benefit of this Training – What will I learn?

- d) Ability to focus on effective identification of root cause analysis and promotion of positive action.
- e) To be able to place a clear priority on best practice management within a strong quality assurance “compliance-based” system.
- f) Understand techniques to focus on the organisational issues during the audit including the relationship within the work place and responsibility to address issues.
- g) Understanding how an effective Quality Assurance system can support the effectiveness of the organisation

Why Should I choose SAS for the training?

Sofema Aviation Services is a Regulatory Training and Consulting company with 45 years of commercial aviation experience and 10 years operational experience. Since the start we have provided certificates to approx 30,000 delegates and we have grown for 2 primary reasons!

The first is that we are professional and we listen to our customers.

The second reason is a combination of outstanding course fees, together with a world beating discount program which leaves our competitors way behind – please do not take our word for it, [check it out!](#)

What Makes SAS Compliance Monitoring for Ground Operations and Ground Handling – 3 Days Different?

Because our courses are written by people who have lived through the regulations. The author of the training material has more than 25 years’ experience as an auditor across the entire regulatory spectrum.

At Sofema Aviation Services our focus is on accepting that compliance with Regulations is in fact minimum compliance. Interpreting the regulations in a way which enables the development and optimisation of our business is where we should see opportunity to drive efficiencies and cost saving.
