## Introduction

Effective 24 March 2020 EASA has with the introduction of Part CAMO has created a requirement for Initial and Recurrent – Integrated Safety & Human Factors Training.

By September 2021 all European CAMO Organisations should transition to Part CAMO and will need to demonstrate mandatory compliance with Safety & Human Factor Training In Accordance with GM2 CAMO.A.305(g)

This Course satisfied the SMS Part of the initial training obligations related to Safety Management Systems within a CAMO environment

With SMS we have a set of regulations, which allow Industry to establish best-practice that fits different cultures and place the main emphasis and duty on improving safety performance.

This requires a real “team effort” as regulator and airline are all part of one large system.

Working as a team it will be possible to improve an already highly impressive safety record, and allow organisations to conduct more of their own oversight and assurance.

People are at the core of our aviation system and the need to remain aware of the potential for human error driven exposure is ever present.

The course meets the partial intent of EASA Part CAMO Requirements (Initial SMS & human factors training and covers all the SMS topics of the training syllabus specified in GM2 CAMO.A.305(g)

The training will introduce the delegates to all elements of Aviation Safety with the intention of providing a better understanding of the subject and to find workable methods to improve standards and compliance.

It’s objectives are to consider and understand the implications of error, the organisation’s safety culture, its procedures and safety policy and methods of communication.

## Who is the Course for?

For anyone who wishes to engage with the aviation maintenance system or who has an organisational obligation to ensure completion of Initial CAMO SMS Training.

The training will also be of benefit for anyone who needs to understand, manage and support the need to fully engage with Safety System interaction within the organisation.

## What is the Benefit of this Training – What will I learn?

- a) Be able to demonstrate compliance with EASA GM2 CAMO.A.305(g) related to SMS
- b) Achieve an in depth understanding regarding basic Aviation Safety Concepts
- c) Be able to consider SMS Objectives and integrate into key areas of Aviation Safety Maintenance
- d) Achieve a strong Understanding of Safety Principles

## Why Should I choose SAS for the training?

Sofema Aviation Services is a Regulatory Training and Consulting company with 45 years of commercial aviation experience and 10 years of operational experience. Since the start, we have provided certificates to approx 30 000 delegates and we have grown for 2 primary reasons!

The first is that we are professional and we listen to our customers.

The second reason is a combination of outstanding course fees, together with a world beating discount program which leaves our competitors way behind – please do not take our word for it, [check it out!](#)

## What Makes Safety Management Systems (SMS) For EASA Part CAMO Team Members 1 Day Training Course Different?

Because our courses are written by people who have lived through the regulations. The author of the training material has more than 25 years' experience as an auditor across the entire regulatory spectrum.

At Sofema Aviation Services our focus is on accepting that compliance with Regulations is in fact minimum compliance. Interpreting the regulations in a way which enables the development and optimisation of our business is where we should see opportunity to drive efficiencies and cost saving
