

Continuous Airworthiness Management for Large AC – 2 Days

Introduction

This course is focused on persons who are involved in the oversight and management of Large Aircraft within a Continuing Airworthiness Management Organisation (CAMO).
 The course will be of particular interest to Persons who are or intend to become Continuing Airworthiness Managers
 Amongst the many duties include the specific management of Continuing Airworthiness, the Management and Optimization of the Maintenance Program. Delivery of an effective Reliability Program. Detailed Work Planning and Scheduling, Budgetary Control and other considerations. Inventory control. Subcontract Co-ordination, Planning of safety critical tasks,

Coordination with Production Planning and availability and the control of approved data.

The course delivers a detailed practical understanding of EASA Regulations relevant to the Part M Environment. An understanding of the maintenance organisations responsibilities, contracted arrangements, and a thorough understanding of the organizational responsibilities associated with Part M compliance including the various options related to the management of the Airworthiness Review Certificate Process

The course is focused and stimulating, very practical and participation is encouraged.

Who is the course for?

It is for persons who are involved in the technical management of Commercial Aircraft Maintenance (CAMO), Including the Airworthiness Review Certificate (ARC) Technical Engineering, Maintenance Planning, CAMO Quality Auditors, Reliability, Technical Records as well as anyone with an interest to achieve an effective interface with an EASA Compliant Maintenance Department.

What is the Benefit of this Training – What will I learn?

- Achieve a solid understanding related to the role of Continued Airworthiness Management (CAM)
- Able to engage in a more practical way with Part M Functionality and to avoid or mitigate problems
- Able to use the regulation to proactively manage the Continuing Airworthiness (CA) of your aircraft
- Understand the activities which support the analysis of Safety Data including SB's and AD's
- Understand the purpose of STC's and how they are integrated into the maintenance Program
- Understand the roles and responsibilities within the various CAMO groups including Reliability, Technical Records, Engineering, & Maintenance Planning

Why Should I choose SAS for the training?

Sofema Aviation Services a Regulatory training and consulting company with 45 years commercial aviation experience and 10 years operational experience. Since we started we have provided certificates to approx 30,000 delegates and we have grown for 2 primary reasons!

The first is that we are professional and we listen to our customers. Please visit our [download area](#) as an example of how we engage with our customer.

The second is not only the fact that our prices are far more cost effective than our competitors it is that our discount program leaves all the others way behind – please do not take our word for it [check it out!](#)

What Makes SAS Continuous Airworthiness Management for Large A/C – 2 Days –Different?

Because our courses are written by people who have lived through the regulations. The author of the training material has more than 25 years' experience as an auditor across the entire regulatory spectrum.

At Sofema Aviation Services our focus is on accepting that compliance with Regulations is in fact minimum compliance. Interpreting the regulations in a way which enables the development and optimisation of our business is where we should see opportunity to drive efficiencies and cost saving.
