

# Part 145 Stores Tooling Control, Inspection Procedures & Best Practice – 1 Day

## Introduction

Ensuring the integrity of tooling & equipment used for measuring is of critical importance particularly within the aviation industry.

We should all understand that the cost of failure is high within our Industry and take all measures to ensure effective oversight and control.

Maintaining an effective calibration program is not only a mandatory requirement it should be embedded in the organisations procedures.

Appropriate awareness of the calibration program should be fully documented and understood throughout the organization’s technical personnel.

This specific 1day training is designed to provide attendees with:

A detailed practical understanding of the requirements to Manage and Develop an Aviation Tooling Store.

To provide a regulatory and industry perspective for staff involved in Tooling Management & Control

Develop the attendees understanding of airworthiness including the importance of managing FOD & ESDS

To Gain Familiarity with tooling & Calibration Procedures.

## Who is the Course for?

It is for anyone with an interest who needs a detailed awareness of EASA Part 145 Stores Tooling & Calibration Control & Inspection Management & Inspection Procedures

## What is the Benefit of this Training – What will I learn?

This training is designed to cover all elements which are essential to the effective management and operation of a fully compliant tool store .

- a) Understand the processes which drive effective management of a Part 145 Compliant Tool Store.
- b) Understand the process of managing documentation related to airworthiness and tooling and calibration control.
- c) Understand the principles of Electrostatic Inspection.
- d) Have confidence in full compliance within the supply chain and the ability to perceive opportunity to improve & develop the Tooling Store

## Detailed Content / Topics (The Following Subjects Will Be Addressed)

- Abbreviations & Terms
- EASA Part 145 Tooling Store General Introduction
- Introduction to Aircraft General Tooling
- Considerations Related to Part 145 Aviation Tooling Control
- Annual & Periodic Tooling Inspection
- Stores Tooling & Equipment Issue and Return Inspection Requirements
- Tooling Calibration Management & Control Process
- Introduction to Foreign Object Debris (FOD) – Foreign Object Damage
- Introduction & Awareness Electrostatic Sensitive Discharge
- Best Practice House Keeping, Cleanliness and Safety
- The Use & Control of Alternate Tooling

## Target Groups

The course is designed for Personnel who are required to manage, or operate within a Tool Store including Calibration Quality Audit staff will also benefit from attendance at this course.

## Pre-Requisites

A background in an aviation maintenance environment is an advantage.

## Learning Objectives

To provide attendees with:

A detailed practical understanding of the best practice and organisational requirements related to tooling store control and management

Provide the attendees with an understanding of best practice tool control Inspection & Calibration

## What do People Say about Sofema Aviation Services Training?

“Very effective, useful and informative training.”  
“Absolutely perfect examples and clear for understanding training.”  
“The instructor has excellent teaching skills and was sharing personal experience”  
“Very effective, useful and informative training.”  
“All the practical examples provided during the training were useful.”

## Certificate Wording for this Course

*EASA Part 145 Tooling Store General Introduction to Aircraft, Part 145 Aviation Tooling Control, Annual & Periodic Tooling Inspection & Calibration Control, Issue and Return Inspection Requirements, Foreign Object Debris (FOD) & ESDS Awareness, Use & Control of Alternate Tooling.*

## Duration

1 Day – Start at 09.00 and finish at 17.00 with appropriate refreshment breaks.
