

EASA Regulation EC 965/2012 for EASA Specialized Operations (SPO) Operators – 1 Day

Introduction

A commercial SPO operator is an operator who performs or intends to perform commercial non-transport operation such as specialised operations by receiving remuneration or other valuable consideration against those services.

Regulation 965/2012 has a significant impact affecting all European Operators. This training is specifically focused on key personnel in Aviation Management, Flight Operations or Aircraft Maintenance environment involved in or with responsibility for the implementing Part OPS transition from EU OPS.

The new Air Operations requirements consist of the Regulation and its implementing measures/Implementing and the corresponding Acceptable Means of Compliance (AMC) and Guidance Material (GM), which are published on the Agency website as Decisions.

EASA recommends Competent authorities responsible for the oversight of SPO operators and operations should assess carefully each individual case to establish if there is a commercial operation, resorting if necessary to information otherwise available to social security or taxation bodies.

Specialised operations (SPO) are not commercial air transport (CAT) operation; hence, passengers cannot be transported during a SPO mission flight. However, task specialists may be carried during such a flight.

Who is the Course for?

Regulatory Authority Members, Flight Safety Department Managers and Inspectors with operational oversight responsibilities. Operations Accountable Managers and proposed Nominated Persons (NP) Flight OPS, Maintenance, Crew Training and Ground Ops, Compliance Monitoring Managers (Quality Managers) and Auditors, Safety Managers, Flight Safety Officers, Flight Operations Officers and Cabin Crew Management.
