

Safety Management Systems for EU 1178/2011 & EU 965/2012 - 2 Days

Introduction

It is an EASA obligation for each organisation to remain fully compliant with all regulatory and associated requirements.

Within our respective organisations (Operator & ATO) we are responsible for the Quality Control and the effectiveness of the Safety Management System. We typically be in receipt of numerous audits both internal from the quality Assurance department and externally from the Regulatory Authority and Customers.

Safety Management is looking at Risk and Safety Management Systems should focus extensively on the analysis of the data derived from the contributing elements of the various impacted areas.

The Safety Management System identifies as an essential goal, the improvement of Safety Performance. In so doing the SMS aims to deliver an improvement in the risk exposure.

The ability to communicate effectively and to analyze root causes are without doubt essential skills for business area managers.

The purpose of this training is to identify best practice techniques and behaviors to support the interpretation of audit findings and how these can be understood, analyzed and mitigated.

The entire program is focused on the roles and responsibilities of the Senior Managers and the need to fully engage with the organisation system as managers and controllers. It is a highly practical course offered by Sofema Aviation Services is designed specifically for all Flight Operations & Approved Training Organisation Senior Managers and provides a detailed understanding of the techniques associated with delivering an effective safety management system.

Who is the course for?

This training is highly relevant for Accountable Managers, Directors, Managers, Safety System Stakeholders. Operations Directors, Managers, Supervisors. Safety Managers, as well as business area stakeholders who need to have a deep appreciation of the safety management systems.
