

Case Study Training Program for EASA 145 Line Maintenance Certifying Staff

RAS-Tech – www.rastechnic.aero is an EASA Part 145 Line Maintenance Organisation based at Otopeni Airport Bucharest. Customers Include British Airways & Vuelling.

What Regulatory Training Does EASA Require?

In Accordance with the following 145.A.30(e) and associated AMC/GM & Appendix IV to AMC 145.A.30(e) and 145.B.10(3).

The organisation shall establish and control the competence of personnel involved in any maintenance, management and/or quality audits in accordance with a procedure and to a standard agreed by the competent authority.

In addition to the necessary expertise related to the job function, competence must include an understanding of the application of human factors and human performance issues appropriate to that person's function in the organisation.

This should include also:

Fuel Tank Safety training (Appendix IV to AMC 145.A.30(e) and 145.B.10(3)).

EWIS training (AMC 20-22)

RAS Tech has chosen SofemaOnline www.sofemaonline.com to provide both mandatory and vocational EASA regulatory Compliant Training. Factors influencing the decision include flexibility, efficiency and cost effectiveness of online training.

Several EASA Part 145 Courses both Mandatory and Vocational have been identified and introduced as a requirement to ensure a common standard and shared understanding across the business for all maintenance staff.

Courses chosen for the Initial Program are:

1/ Part 145 training

2/ Human Factors

3/ Fuel Tank Safety

4/ EWIS

5/ Stores Inspection

Commented Steve Bentley Quality & Safety Manager of RAS Tech;

“An essential consideration within an EASA 145 Organisation is the management of Competence. By taking the initiative to provide a common training program to all new starters (regardless of the currency of the pre-existing recurrent training status) RAS Tech is ensuring that we are able to assure the knowledge element of the Competence Program is managed in an effective way)”

About SofemaOnline www.sofemaonline.com

Online training is an extremely cost-effective method for delivering niche regulatory trainings, typical of the trainings which are offered by Sofema Aviation Services.

A fundamental requirement for online training is to ensure that it provides the essential content which is focused on a deep understanding of the subject matter.

At www.sofemaonline.com we ensure that behind each training is a practical knowledgeable tutor.

Major benefits include convenience and flexibility, availability ease of use through any internet connected computer and the ability of the student to learn at their own pace without any limitations.

- *Provides an opportunity for all your employees to build competence in the workplace*
