Available Free when you book the following in-company training as a webinar –

EASA Part CAMO - Safety Management Systems – Regulatory Obligations - 1 Day  
– Please email [team@sassofia.com](mailto:team@sassofia.com) for further details

### **What is found within a Part CAMO SMS?**

The following elements should be considered in relation to SMS in an EASA Part M Organisation:

- a) Regulatory Compliance
- b) Human Error & Error Management
- c) Compliance Monitoring
- d) Safety Risk Management
- e) Safety Culture

According to EASA, this regulatory change is ultimately designed to create a harmonised approach to the implementation of the new management system requirements for all Continuing Airworthiness Management Organisations (CAMOs), ensuring effective compliance monitoring, safety risk management and oversight for all continuing airworthiness management activities.

### **Guidance on Development of Part CAMO Safety Management System Manual SMSM**

Sofema Aviation Services providing support for fast track development of your Part CAMO Safety Management System Manual?

SAS is pleased to present a template document suitable for building your Part CAMO Compliant Safety Management System Manual (SMSM) –

Reference - CAMO.A.200 Management system (Regulation (EU) 2019/1383)

(a) The organisation shall establish, implement, and maintain a management system that includes:

- (1) clearly defined lines of responsibility and accountability throughout the organisation, including a direct safety accountability of the accountable manager;
- (2) a description of the overall philosophies and principles of the organisation with regard to safety, referred to as the safety policy;
- (3) the identification of aviation safety hazards entailed by the activities of the organisation, their evaluation and the management of associated risks, including taking actions to mitigate the risks and verify their effectiveness;
- (4) maintaining personnel trained and competent to perform their tasks;
