

Introduction to Aviation Regulatory Structure - 1 day

Introduction

As a highly complex and equally well regulated industry, it is important for those who are involved with aviation to understand their role within the business and the broader regulated environment.

This course offers both novice and experienced aviation professionals with an overview of the section of the industry that they work in. The course demonstrates how major organisations like ICAO, EASA, and the FAA have been developed in the context of historical development and present-day issues effecting the civil aviation industry.

Most importantly, the course discusses how the framework of national aviation organisations relates to ICAO and ISARPS as well as provides basic guidelines to individual aviation professionals in terms of the position of their role in the aviation environment and, not least, the impact that their decisions may have with regard to compliance with national aviation regulations and departmental/company policy.

What is the Benefit of this Training - What will I learn?

- a) Understanding the structure and impact of ICAO
- b) Understanding the Organisational Roles and Duties within ICAO
- c) Recognize the functions and objectives that support ICAO policies
- d) Become familiar with the functions of the international standards and recommended practises created by ICAO
- e) Gain knowledge about the key ICAO annexes
- f) Gain knowledge of the Chicago Convention`s role and composition
- g) Have an understanding of the general principles and application of the Convention
- i) Learn about the EASA's tasks and responsibilities, as well as its mission and structure
- j) Be able to understand the mission and role of the FAA
- k) Be familiar with which aspects of civil aviation the FAA regulates
