EASA Integrated Air Legislation Course - Overview - 1 Day

Introduction

This training will provide a detailed overview of the EASA regulatory process.

It is specially designed to introduce delegates to the working of the various elements of the regulations.

The Training focuses on the various roles and responsibilities of Operators, Maintainers Design, and Production organizations.

The course is designed for students who are understanding for the first time the regulatory structure.

Who is the course for?

The training is for individuals working in the aviation industry who need to have a good understanding of the European Aviation Safety Agency (EASA) regulations and how they apply to their specific areas of work. This can include pilots, maintenance personnel, air traffic controllers, ground handlers, aviation managers, and other aviation professionals.

What is the Benefit of this Training – What will I learn?

The course will provide you with an overview of the European Aviation Safety Agency (EASA), its objectives, and its role in regulating the aviation industry.

You will learn about the EASA regulatory framework, including the different types of regulations, guidelines, and standards that EASA publishes.

You will gain an understanding of the scope of the EASA regulations and how they apply to different areas of the aviation industry, including operations, airworthiness, personnel licensing, and air traffic management.

The course will cover the responsibilities of different stakeholders in ensuring compliance with EASA regulations, including operators, maintenance organizations, and national aviation authorities. You will also learn about the enforcement mechanisms that EASA uses to ensure compliance.

You will gain knowledge of Safety Management Systems (SMS) and their importance in ensuring aviation safety. The course will cover the basic principles of SMS and their application in the aviation industry.
