

EASA & FAA Regulatory Overview for Executives and Senior Managers - 2 Days

Introduction

This is an intensive 2-day training for busy Industry leaders; the focus of the training is a comprehensive understanding of EASA and FAA Regulatory requirements and the associated Roles and Responsibilities.

The course is aimed at persons who have specific obligations regarding the accountability for the organization to meet its obligations in respect of Safety, Quality, Regulatory Compliance, and Financial well-being. Including AOC, 145, and other Approved Organizations.

This in-depth course provides detailed practical training in management obligations and methodologies to ensure a fully compliant, effective, and efficient organization.

The course is highly participative and promotes industry best practices as standard, it is delivered in a confidential environment by an industry professional with over 40 years of Commercial Aviation experience.

Aviation Authorities may choose to interview Form 4 candidates. All relevant areas are covered during the course.

A Full overview of both EASA and FAA regulations will be provided during the introduction.

What is the Benefit of this Training – What will I learn?

Some of the key areas that you will learn about during the training include:

- a) The roles and responsibilities of the European Aviation Safety Agency (EASA) and the Federal Aviation Administration (FAA) in regulating aviation safety.
- b) The regulatory requirements for safety management systems (SMS) and the importance of a safety culture in aviation operations.
- c) The key compliance issues that aviation executives and senior managers need to be aware of, include operational compliance and airworthiness.
- d) The importance of risk management and how to implement effective risk management systems in aviation operations.
- e) The regulatory requirements for aircraft maintenance, including maintenance programs, airworthiness directives (ADs), and other maintenance-related issues.
- f) How to implement effective compliance programs and respond to regulatory inspections and audits.
- g) Best practices for managing safety and compliance in aviation operations.
