

Production Planning Basics - 1 Day

Introduction

Aircraft Production Planning belongs to the Maintenance Organisation and is related to the size of the organisation, from a very humble structure to an intensive business management process.

There is much opportunity available within the Production Planning business area to deliver savings and the challenge is to identify efficient business processes that can be used to gather the data, analyze and measure the opportunities and finally to act on this.

This Training introduces the delegate to the basics of the EASA 145 Production Planning Process and considers the elements which are involved to deliver an effective Production Planning System.

What is the Benefit of this Training – What will I learn?

- a) To achieve a detailed understanding of the regulatory environment related to EASA Part 145 Production Planning
- b) Be able to explain the roles and responsibilities related to the interface between Maintenance and Production Planning.
- c) Be able to explain and promote a comprehensive understanding of the role of Production Planning in particular to include all the fundamental activities.
- d) Be able to use the regulation to proactively manage full compliance within EASA Part 145 Aircraft Maintenance Organisation (AMO) Production Planning Environment.
- e) To achieve an understanding of industry best practice techniques to deliver efficiencies as well as effective Production Planning.
- f) To be able to promote an understanding of the Role of Safety Management Systems both within base maintenance in general as well as in the area of Production Planning particularly
- g) Understanding the various challenges which face an organization to optimize the Production Planning Process.
- h) Identify Specific issues which are both organizational and Industry specific.
