

Aviation English for Technical Engineering Staff – 1 Day

Introduction

Anyone who's organisational role includes the need to create technical or procedural content on behalf of the organisation has a responsibility to ensure that the information is delivered in a clear, correct and effective way.

This course is aimed at sharing best practice use of Aviation Technical English particularly focused on a clear understanding of the "Maintenance Planning" objectives, It is essential in terms of efficiency and effectiveness of the organisation process that we communicate "task" requirements in the correct way.

A primary objective is to ensure clarity in your writing and avoid any reference to vagueness – (note that insufficient understanding of the task specifics may lead to ambiguity in writing).

Who is the course for?

The "Aviation English for Technical Engineering Staff – 1 Day" course offered by Sofema Aviation Services is designed for technical engineering staff in the aviation industry. It targets maintenance technicians, technical engineers, quality control inspectors, avionics technicians, aircraft engineers, technical documentation specialists, and maintenance planners. This course enhances English language skills for effective communication in aviation maintenance and technical operations. Participants will gain proficiency in understanding and conveying technical information accurately, improving overall communication within the industry.
