

Managing Ramp & Airside Safety – 4 Days

Introduction

The Managing Ramp & Airside Safety course focuses on infrastructure, equipment, personnel and the processes that operate in airside and ramp areas.

The course details the "how, what and why" of airside and ramp safety, how risks are assessed and mitigated and the considerations and requirements that make up a safe operating environment.

The airside and ramp areas of an airport are complex and hazardous operating environments.

Safety is the highest priority and understanding what can go wrong as well as preventing accidents requires a detailed and broad knowledge of the subject

Who is the course for?

Auditors, Inspectors and Safety Teams from Airlines, GSP's, Airports & Regulators who want to improve their knowledge of this area would benefit from attending this course.
