

## SMS Risk Assessment for Airports - 2 Days

### Introduction

Developing an effective process within the organization to perform Hazard Identification, carry out analysis, and develop appropriate mitigations is a fundamental attribute of an effective Safety Management System.

The Strategy we adopt within the organization sets the tone for how effective the process will ultimately be.

If we view regulatory compliance as a minimum level, the organization has significant opportunities to develop effective strategies which will not only drive safety behaviors but can lead to significant optimizations across the business.

This two days Essentials training is aimed at persons who are already working in the Quality & Safety departments and will provide a platform to help them develop a personal action plan to improve the Risk Management Process.

An element of the training will include several pre-course questions and a short exercise that will improve the specific understanding of your challenges and needs to be discussed in general terms during the training.

### Who is the course for?

The course is made for aviation professionals, including airport managers, safety officers, and other personnel involved in airport operations. It provides them with comprehensive training and tools to effectively assess and manage risks within the airport environment, ensuring compliance with safety regulations and enhancing overall safety performance.

### What is the Benefit of this Training – What will I learn?

The participants will gain essential skills and knowledge related to risk assessment in airport operations. This includes understanding the principles of safety management systems (SMS), conducting thorough risk assessments, identifying hazards, analyzing risks, and implementing effective risk mitigation strategies within an airport setting.
