# Safety Management Systems For Aerodromes – 3 Days

## Introduction

An aerodrome operations-specific 3-day basic programme designed for those responsible for developing, implementing and participating in a systematic approach to managing aviation safety, including the necessary organizational structures, accountabilities, policies and procedures.

The course recognizes and responds to the dynamic airport environment where several key service providers may have to facilitate the integration of individual SMS to ensure a safe operational environment. The importance of managing safety within the airside environment is the focal point of the course.

## Who is the course for?

Aerodrome Senior Management, Quality, Operations and Safety Managers, and others tasked with managing safety or those who are involved with developing and implementing an SMS or need to possess knowledge and understanding of airside safety and operations.
