

Safety Management Systems For Ground Operations– 5 Days

Introduction

An aerodrome operations-specific 5-day programme designed for those responsible for developing, implementing and participating in a systematic approach to managing aviation safety, including the necessary organizational structures, accountabilities, policies and procedures.

The course recognises and responds to the dynamic ground operations environment where Ground Service Providers may have to facilitate integration of individual SMS to ensure a safe operational environment. The importance of managing safety within the airside environment is the focal point of the course.

Who is the course for?

All levels of management within Ground Service Provider organisations, others tasked with managing safety or those who are involved with developing and implementing an SMS.
