

Aviation Safety Management Systems for AM & Leadership Team- 2 Days

Introduction

Introduction - Specifically focused on the challenges faced by the leadership team designed to enable the Accountable Manager (AM) & Nominated Post Holders (NP) to fully engage with the SMS and the opportunity to utilise the potential SMS data source to effectively manage, optimise and grow the business.

Background – Aviation Organisations which have a functioning SMS which is typically related to the regulatory approval to ensure the organisation meets its objectives related to the various process (depending on the type of organisation)

- Safety Management System (SMS)
- Compliance Management System (CMS)
- Occupational Health & Safety (OH & S)
- Fatigue Management System (FMS)
- Security

What is available is an opportunity to place a wider interpretation on Safety Data and Performance and to develop ways & means to improve the operating efficiency and overall performance (including safety) of the organisation.

Business operational risk reduction is most likely to occur when the organisation is able to establish an Integrated Management System (IMS) across all business areas.

Additional benefits will be found through better integration which will support a reduction in operating costs moreover building an Integrated Management System which is able to capitalise on the availability of SMS driven data across the organisation will facilitate the delivery of a more efficient and value driven business process

Who is the course for?

Accountable Managers, Senior Executives, Nominated Post Holders (NPH) & Operational Managers, Civil Aviation Authorities Inspectors and SMS, CMS OH&S Senior Personnel.
