

EASA / GCAA Compliant CAMO Quality Oversight of AMO Auditing – Best Practice Review & Recurrent – 2 days

Introduction

This course is specifically designed to address the needs of an Operator's CAMO and considers all Quality System oversight and audit obligations to ensure:

- a) Full Compliance with EASA / GCAA Regulations
- b) To promote effective optimization of organisation processes which are impacted by or interdependent with Quality System Processes Auditing is either a tick the box exercise to keep the regulatory authority at bay or Auditing is a powerful tool for establishing the effectiveness of an organisation. (Incidentally we teach the latter)

Being able to support an in-depth understanding of non-conformity both within your organisation as well as within 3rd Party service providers is part of the mission. Being able to clearly explain the exposure to your organisations business area owners and post holders is an essential attribute of an effective Quality Assurance Auditor.

Our Detailed Auditing Techniques may be applied in any audit situation including management system processes, determining the effectiveness of existing or client quality & safety audit systems. The training is extremely effective and is suitable for both regulatory authorities as well as industry.

Have you ever wondered how it is that accident investigators understand all the shortfalls and exposures – but after an accident or incident. It is possible to audit at this level before an accident.

This course is highly interactive with all delegates having the opportunity to fully engage to consider best practice techniques related to both auditing techniques and compliance oversight methodology.

Who is the course for?

This training is suitable for Compliance Managers, Maintenance Managers and Compliance Auditors. It is relevant for members of the quality Assurance Audit department, all Business Area Stake Holders and Nominated Persons.
