

European Aviation Safety Agency (EASA) & Federal Aviation Agency (FAA) Suspect Parts Training – 1 Day

Introduction

The Challenge Facing the Aviation Industry – Suspect Unapproved Parts

Whether you are dealing with EASA or FAA parts the challenge remains the same – namely to ensure that the parts are airworthy and from a reputable source.

SUPs cover a multitude of aspects such as parts lacking proper documentation; counterfeit parts; parts rejected during production because of defects; improperly maintained parts, etc. Substantial progress has been made to reduce the number of unapproved parts being introduced into the aviation system, yet constant vigilance and training is paramount to ensure that the harm SUPs impose is addressed.

Who is the course for?

The course is intended for personnel who are required to manage or operate an Aviation Store or who are required to accept material into an Aviation Store. The course would also benefit Certifying Staff, Quality Inspectors, Quality Managers, Maintenance Managers, and Maintenance Engineers.

What is the Benefit of this Training – What will I learn?

- a) A detailed practical understanding of the EASA & FAA Regulatory Requirements to Understand the Challenge of Ensuring only approved Parts are accepted into the Aviation Store
- b) Provide the attendees with an understanding of EASA & FAA Suspect Unapproved Parts Best Practice Procedures
- c) To review the problems associated with Suspect Parts and where to verify the status
