

FAA Essential Advisory Circulars for Powerplant Repair Stations – ½ Day

Introduction

Compliance with aviation regulations is essential to ensuring safe flight, however, knowing how to comply with regulations can be a daunting and confusing task. The FAA provides guidance for compliance with Federal Aviation Regulations (FAR) in the form of an Advisory Circular.

Advisory Circulars typically refer to industry standards and define an FAA-accepted means, but not the only means, of accomplishing or showing compliance with a FAR.

From the array of Advisory Circulars relevant to FAA 14 CFR Part 145 certificated Repair Station maintaining powerplants, a number of these are particularly important to Repair Station personnel.

The instructor explains these essential Advisory Circulars in detail and provides examples of methods of compliance.

Who is the course for?

The course is designed for individuals working in powerplant repair stations who need to understand and comply with the Federal Aviation Administration's (FAA) advisory circulars specific to powerplant maintenance.

What is the Benefit of this Training – What will I learn?

The participants will learn about the key advisory circulars issued by the FAA that pertain to powerplant repair stations. The course will cover topics such as airworthiness standards, maintenance procedures, quality control, and documentation requirements outlined in the advisory circulars. By the end of the course, they will have a solid understanding of the specific regulations and guidelines that apply to powerplant repair stations, enabling them to ensure compliance and maintain the highest standards of safety and quality in their operations.

Detailed Content / Topics - The following Subjects will be addressed

- Abbreviations and Terms
- FAA Advisory Circulars – Powerplant Repair Station
- Essential Advisory Circulars
- 20-62E Eligibility, Quality, & Identification of Aeronautical Replacement Parts
- 39-7D Airworthiness Directives
- 43-18 Fabrication of Aircraft parts by Maintenance Personnel
- 43-9C Maintenance Records
- 145-9 Guide for Developing and Evaluating Repair Station and Quality Control Manuals
- 145-10 Repair Station Training Program
- Review
- Quiz

Target Groups

This course is beneficial for operations management, quality assurance personnel, supervisory personnel, inspection personnel, and persons issuing approvals for return-to-service.

Pre-requisites

A background in an aviation environment.

Learning Objectives

An essential element of benefit from this training is to be able to understand and develop a method of compliance with Federal Aviation Regulations that are relevant to your organization. Since FAA Inspectors use FAA Advisory Circulars as reference material when carrying out inspections for compliance of your organization, you will be well positioned from the knowledge gained from this course to perform your duties to achieve and maintain compliance.
