

Airside Safety Training – 3 Days

Introduction

The airport is a busy and dynamic environment with many stakeholders who are all required to work in an integrated seamless process to deliver a strong, safe, and robust system. With the introduction of EASA Commission Regulation (EU) No 139/2014, EASA is creating a performance-based regulatory environment for Aerodrome Operators and Operations.

Any Organisation operating on an aerodrome has a fundamental obligation to manage both aircraft safety and occupational health and safety with a demonstration of due diligence, managed to the highest standards.

This is an industry-specific 3-day intensive program developed for all persons who are involved with day-to-day management as well as those who are working within the environment. In addition, it will be appropriate for Quality Auditors and of interest to the senior management and executive team.

The training focuses on both ICAO as a core recommended practice and EASA as a developed regulatory environment, in all cases, reference is made to best practice behaviors.

This course covers all subject matter to an initial level and is suitable and effective for new starters, It will also serve as an acceptable course for the purpose of recurrent and refreshment of "Airside Safety Training" for all personnel working on the airside.

This course ensures the fulfillment of a continuous safety approach across both the Airside Ramp and Movement Areas.

Who is the course for?

All Airport Managers, Nominated Persons and Business Process Owners, Safety Personnel, Operations Duty Managers, and Supervisors. Compliance Management Staff, Handling Agents, and Air Traffic Control.

What is the Benefit of this Training – What will I learn?

- a) Achieve an understanding of the integrated functioning of the airport's operational processes and systems.
- b) Achieve a detailed understanding of the roles and responsibilities of the multiple stakeholders who are involved in airside safety together with awareness of individual responsibilities.
- c) Be able to consider and explain the various elements of the Airside Safety System including key strategies for dealing with safety risks and the importance of safety reporting.
- d) Gain the competence to identify the key hazards which are typically found in an airside environment together with effective mitigations to reduce exposure

Detailed Content / Topics - The following Subjects will be addressed

- Airside Safety Introduction
- Abbreviations
- Regulatory Background
- General Principles of the Management of Health and Safety Airside
- Safety Stakeholders, Roles, and Responsibilities
- Assessing & Managing Risks within the Airport Environment
- The Role of Compliance Management within the Airside Environment
- Managing Airside Safety Audits & Inspections
- Ramp Human Factors
- Ramp Safety Operations
- Aircraft Marshalling
- Oversight and Management of Operational Areas
- Airside Safety Management Best Practices
- Runway Safety & Visual Aids Management
- Bird & Wildlife Hazard Management
- Adverse Weather & Low Visibility Operations
- Winter Operations
- Managing FOD
- Vehicle Operations & Airside Driving;
- Adverse Weather;
- Aircraft Marshalling;
- Incidents & Accidents;
- Managing Airside Emergency Response

Target Groups

This course will be of very significant benefit to all persons with specific involvement in Airside Operations.

Aerodrome Management and Operational Staff, Safety Managers, Quality Managers, Aerodrome Safety Personnel, Regulators and other Airside Safety take holders.

Pre-requisites

Background in aviation.

Learning Objectives

- Understand the techniques used to manage Airside safety
- Understand the purpose and methodology of Airside Compliance and SMS-driven oversight
- Understand the process by which an integrated Airside Safety System should continue to develop within an Aerodrome Environment

What do People Say about Sofema Aviation Services Training?

"I found satisfying answers to all my questions."
"The instructor demonstrated a very deep knowledge of the subject."
"The length of the course fits my needs and expectations."
"The content was really effective, I gained a lot of new knowledge."
"The practical examples were perfectly delivered."

Duration

3 days – Start at 09.00 and finish at 17.00, with appropriate refreshment breaks.
