

Aviation Quality & Safety Auditing & Risk Assessment Train The Trainer – 4 Days

Introduction

Aviation Quality Systems have been around for many years, A Proactive SMS system has been mandated by ICAO since Jan 2009, and the Development of Safety Management Systems SMS continues to gain in prominence and importance in both Airline Operations a Maintenance Organisations.

The Aviation Quality System should be at the heart of the operation, fully functioning within every department and element of the organization, as part of this organizational system. Internal part time auditors can provide a significant contribution to the effectiveness of the quality system.

Being able to train your own auditors adds a competitive advantage. Developing an organizational capability to deliver Quality & Safety Auditor training to include Hazzard and Risk Assessment will benefit the organization and allow the training and deployment of internal auditors.

The primary purpose of this 4-day training is to focus your QA / SMS Nominated Trainer on the most effective processes for delivering auditor training. The course is not intended to substitute for either QA or SMS training but is nevertheless designed to provide a comprehensive understanding of the requirement for both the QA & SMS systems including an understanding of the different types of audit applicable for each area. Aviation Quality & Safety Auditing & Risk Assessment Train the Trainer course reviews all the fundamentals and considers the various challenges to ensure that all required elements are included and considers effective ways of delivering the training.

All SAS Train the Trainer courses are highly practical and promote best training practices. It is an industry-specific two-day program specifically designed for those who need to manage or deliver Safety Management System Training. This course is highly participative and stimulating. This training is designed specifically for the needs of the Aviation Internal Quality Auditor.

This 4-day highly practical course offered by Sofema Aviation Services is designed specifically to teach Training techniques to Quality Professionals to support them with the process of training internal auditors within their own organisations. It is widely accepted that Organisations which are able to deliver an effective quality audit system, together with a process to follow up with all issues in an effective and practical way, are able to not only drive efficiencies but to grow and flourish.

Who is the course for?

The course is for aviation professionals, regulators, and business area managers seeking to enhance their knowledge and skills in quality and safety auditing as well as root cause analysis within the aviation industry. It aims to provide participants with the necessary tools and techniques to conduct effective audits, identify root causes of safety incidents, and implement corrective actions to improve safety and quality performance.

What is the Benefit of this Training – What will I learn?

Participating in the training offers the following benefits:

- Develop advanced skills in aviation quality and safety auditing techniques and risk assessment methodologies.
- Acquire effective training techniques to impart auditing and risk assessment knowledge to others.
- Enhance your ability to lead and conduct comprehensive quality and safety audits.
- Strengthen your role as a proficient trainer and contributor to aviation quality, safety, and risk management excellence.

Throughout this training, participants will gain the expertise needed to conduct high-quality aviation audits, perform effective risk assessments, and train others in these critical areas, thus contributing to improved safety, quality, and operational standards in the aviation industry.
