

Developing Risk Assessment Strategies – 2 Days

Introduction

Aviation is an incredibly complex business environment. Demands placed on the organization and individuals to deliver are often considerable, and place a burden on key individuals. "The risks and costs in commercial aviation necessitate a rational process for decision-making. On a daily basis, operators and managers make decisions in real-time, weighing the probability and severity of any adverse consequences implied by the risk against the expected gain of taking the risk. This process is known as risk management." – ICAO

The core requirement for an SMS is an effective method of identifying and controlling risk, and an essential element of safety management is the process of risk assessment. The need to identify and control risk is key to protecting the organization and this two-day course will provide the delegates with an understanding of how to identify hazards within their own workplace and to evaluate these hazards to produce a risk assessment. During the course, delegates will work through several examples with an emphasis on group work and discussion to evaluate the differences of opinion, which may come into risk assessment.

Who is the course for?

The course is designed for professionals and individuals who are involved in risk management and want to enhance their skills in risk assessment. It is particularly beneficial for risk managers, project managers, compliance officers, and professionals in industries where risk evaluation and mitigation are critical, such as finance, healthcare, and engineering.

What is the Benefit of this Training – What will I learn?

The participants will gain comprehensive knowledge and practical skills in the field of risk assessment. They will learn how to identify, analyze, and evaluate risks effectively, as well as develop strategies to mitigate and manage those risks. Through interactive exercises and case studies, participants will acquire the necessary tools to create robust risk assessment frameworks tailored to their specific organizational needs.
