

Quality & Safety System Performance Auditing and Hazard Assessment Essentials – 1 Day

Introduction

The Aviation Quality and Safety System should be at the heart of the operation, fully functioning within every department and element of the organisation. Organizations that can deliver an effective quality or safety audit system and a process to follow up with all issues in an effective and practical way, grow and flourish. The 1-day essentials course offered by Sofema Aviation Services is designed specifically for all aviation professionals who need to perform audits either internal or external. It includes a review of the Hazard and Risk Assessment processes as well.

Who is the course for?

This course is made for participants involved in auditing and assessing the performance of Quality and Safety Management Systems within their organizations. This course is suitable for quality managers, safety managers, auditors, compliance officers, and other personnel responsible for evaluating the effectiveness and efficiency of quality and safety systems, as well as identifying and addressing potential hazards and risks.

What is the Benefit of this Training – What will I learn?

Participants will learn the essential principles and techniques for conducting effective audits of Quality and Safety Management Systems within their organizations. They will gain insights into auditing methodologies, data analysis, and reporting to assess the performance and compliance of these systems. Additionally, participants will be equipped with the knowledge and tools to conduct hazard assessments, identify potential risks, and implement appropriate risk management strategies to enhance the overall quality and safety performance of their organization.

Learning Objectives

To equip the attendee with the skills and techniques required to manage and execute meaningful audit programs and audits within their respective companies. The research, planning, execution, and documentation of the audit will be treated as if it were part of a genuine internal audit. To give the attendees a number of exercises including raising their own audit plans, checklists, and reports in relation to their role, using procedures and audit plans drawn from their own company. This will ensure the course is practical and relevant to each attendee.

Pre-requisites

A background in an aviation environment.
