

SMS Introduction Training For Small to Medium Organisations - 1 Day

Introduction

With SMS we have a set of regulations, which allow Industry to establish best-practice that fits different cultures and place the main emphasis and duty on improving safety performance. This requires a real "team effort" as regulators and airlines are all part of one large system. Working as a team it will be possible to improve an already highly impressive safety record and allow organisations to conduct more of their own oversight and assurance. This 1-day training course which is focused on the specific challenges faced by Small and Medium-sized organisations develops the understanding of the organisations responsibility and how the key managers and executives can play a role in assisting to deliver a strong SMS system.

Who is the course for?

The course is specifically designed for employees and management personnel working in small to medium-sized organizations across various industries. The course aims to introduce participants to the concept of Safety Management Systems (SMS) and provide them with the fundamental knowledge and skills needed to establish and implement an effective SMS within their organization, tailored to their unique needs and challenges.

What is the Benefit of this Training – What will I learn?

Participants will learn the fundamental principles and concepts of Safety Management Systems (SMS). They will gain insights into the benefits of implementing an SMS tailored to the specific needs of small to medium-sized organizations. Additionally, attendees will be equipped with practical strategies to initiate and maintain an effective SMS, including risk assessment techniques, incident reporting procedures, and fostering a safety-oriented culture.
