

Safety Management Systems Essentials Overview - 1 Day

Introduction

With SMS we have a set of regulations, which allow Industry to establish best-practice that fits different cultures and place the main emphasis and duty on improving safety performance. This requires a real "team effort" as regulators and airlines are all part of one large system. Working as a team it will be possible to improve an already highly impressive safety record and allow organizations to conduct more of their own oversight and assurance.

This 1-day training course develops the understanding of the organization's responsibility and how the key managers and executives can play a role in assisting to deliver a strong SMS system.

This intensive course is specifically designed for leasing companies and persons who need to have a realistic grasp of the techniques used to deliver an effective SMS system.

It will also be of benefit as a refresher to any Safety Management Stake Holders, Quality Audit Staff, and persons who normally work within the Safety Management System in a maintenance or operational context.

Who is the course for?

The course is made for professionals, managers, and decision-makers across different industries who need a foundational understanding of Safety Management Systems (SMS).

What is the Benefit of this Training – What will I learn?

Participants will learn the fundamental concepts and principles of Safety Management Systems (SMS) and how they apply to their specific industries. They will gain insights into risk assessment, incident reporting, and safety performance monitoring to proactively address safety hazards and improve overall safety outcomes. By the end of the course, participants will be equipped with the knowledge and tools to foster a strong safety culture and ensure compliance with safety regulations and best practices.
