

Safety Management Systems Practical Implementation Guidance & Review – 2 Days

Introduction

An ICAO-compliant Safety Management System provides a mechanism to proactively seek, identify, quantify as well as mitigate risks and potential hazards which exist in the business. Moreover, it provides a mechanism to deliver a safer working process and environment in every facet of your day-to-day business activities.

This course delivers a practical pathway to implement Safety Management System (SMS) within your organization.

The course delivers an SMS implementation program which by focusing on 3 monthly fully achievable and measurable objectives will deliver a real and working SMS over an extended program lasting 2 years.

During the course, we will consider the challenges and issues which need to be overcome and successfully addressed.

Why 2 Years?

Because this is a realistic time frame to genuinely deliver a real and working SMS across your business.

Further Background

An effective SMS is about identifying exposure to risk as felt by the entire business.

This 3 Day intensive training is based on compliance with ICAO Annex 19 and ICAO Doc 9859. The course is highly participative and provides a full understanding of the various roles and responsibilities required to implement an effective SMS system.

The primary focus of the training is to support the delegate's need to deliver effective management of safety including the process to measure risk and exposure and the development of mitigation strategies.

The course also recognizes the importance of a "Top Down" approach to ensure the effective delivery of Each Program is confidential and fully interactive, A basic working knowledge of SMS principles is an advantage in advance of the training.
