

Aircraft Servicing, Cleaning, and Detailing - 2 Days

Introduction

This training is intended to be used as a cleaning, detailing, and grooming guide for the maintenance of the aircraft interior and to ensure that every crew member is aware of manual handling hazards and the mechanisms in place to control them. The cleaning operators should ensure that the techniques learned in this training are applied in operational situations through an adequate monitoring system. Cleaning crew members must implement the techniques learnt when undertaking manual handling activities. The cleaning crew must report to their managers any difficulties in implementing the handling techniques learned.

What is the Benefit of this Training – What will I learn?

Cleaning crew members need to be adequately trained so they understand and respect the procedures that will ensure the effectiveness of the cleaning and disinfecting agents, use the proper personal protective equipment, prevent contamination of other areas, and minimize occupational health and safety risks to the personnel.

Who is the course for?

Cleaning operators and cleaning crew.
