

Our Webinar Training Solution

What is Webinar?

Webinar is an easy and interactive training solution, typically using the services of a "live" Instructor.

It creates a middle ground between classroom and online courses via convenient and user-friendly software technology.

How does the In-company Webinar Training works:

We use Zoom or Microsoft Teams live programs where our instructor takes you through the material in real time with easy to use Software.

Choose from a varied course program with more than 650 courses available. The In-company Webinar Training is the best value solution for groups up to 12 who can attend for one daily price of 1595 Euro. The daily price for groups up to 6 is 1395 Euro.

The size of the group can be increased to 20 with a fee of 45 Euro for additional delegates over 12 and up to 20. The interactive element of the program enables the maximum approximation to the classroom environment, however spares the delegates additional costs such as travel and accommodation.

A visual link between the instructor and delegates will be provided and a moderator is recommended for a group of over 12 delegates.

A PDF Soft copy of the material is available before the start of the Webinar.

An additional advantage of SAS Webinar delivered training is that we provide all attendees with both Soft Copy of the material and an MP4 file (MP4 is an audio & visual format) of the entire proceedings.

What other people say about SAS Webinars:

Sofema Aviation Services is proud of our meticulous approach to sharing our understanding of a highly skilled aviation regulatory environment with fellow professionals. See the feedbacks from our delegates for the webinars that we delivered in the past 5 years to various clients:

"It was a good experience and we learned a lot from your Instructor."

"The discussion also enlightened us more on EASA regulations and how to comply."

"I hope that this cooperation can be continued for our benefits in the future."

"The Instructor kept the attention of the attendees at all times during the webinar."

"Steve's explanations and knowledge are good and very informative. Nothing to do better."
