

ICAO SMS Principles and Standards - 1 Day

Introduction

The course serves as a vital entry point into the world of aviation safety, offering a comprehensive introduction to the fundamental principles and standards of Safety Management Systems.

Throughout this course, attendees will delve into the core concepts of SMS, gaining a deeper appreciation of how safety management systems are implemented and maintained within aviation organizations.

Who is the course for?

This course is made for a range of professionals involved in aviation safety management and regulatory compliance. This includes individuals working in aviation safety roles within airlines, airports, and related services, as well as personnel from regulatory authorities responsible for oversight. The course is also beneficial for aviation inspectors, managers, and executives in aviation organizations, SMS implementers, consultants, and even students and educators in the field of aviation.

What is the Benefit of this Training – What will I learn?

- a) provide participants knowledge of safety management concepts and ICAO Standards and Recommended Practices (SARPs) on safety management in Annex 19, and related guidance material;
- b) develop participants' knowledge to accept and oversee the key components of an SMS, including their implementation, and the establishment of the State safety programme (SSP) in compliance with relevant ICAO SARPs.
