

Progressive Management of Airport Safety Management Systems – 4 Days

Introduction

This intensive 4-day course is specifically designed to focus on the needs of the Safety and Quality Department to ensure delivery to exacting standards. The course is highly participative and assumes prior knowledge of SMS requirements and objectives. The airport is a busy and dynamic environment with many stakeholders required to integrate into a unified SMS process. An effective SMS is about identifying exposure to risk as felt by the entire business. The primary focus of the training is to support the delegate's need to deliver effective management of safety including the process to measure risk and exposure and the development of mitigation strategies.

Who is the course for?

The course is designed for professionals in the aviation industry, including airport managers, safety officers, aviation inspectors, risk managers, airline personnel, ground handling providers, and emergency response teams. It aims to equip participants with the knowledge and skills required to effectively manage safety within airport operations and comply with safety regulations.

What is the Benefit of this Training – What will I learn?

- a) The course equips participants with the knowledge and tools to improve safety management systems at airports, leading to a safer operational environment and reduced risks.
- b) Attendees gain a better understanding of aviation safety regulations, helping airports and related organizations to maintain compliance and avoid potential penalties.
- c) The course provides insights into identifying, assessing, and mitigating risks, leading to better-prepared responses to potential safety threats.
