

Transport of COVID – 19 related Infectious Substances - 1 Day

Introduction

Patient Specimens and Medical Waste are Infectious Substances (Dangerous Goods). COVID-19 Associated Materials must be packed, handled, and transported in order to prevent contamination and avoid the spread of the virus.

COVID-19 has created huge challenges for the supply & transport chain. Not least because of the fact that whilst much of the transport Industry is in "lockdown" There is an obligation to transport to medical laboratories samples for testing as well as many tonnes of medical waste from seriously ill people which needs to be transported to special depots for extermination.

It is essential for all staff involved in the transport and handling of those materials to be properly trained and instructed on necessary procedures for the safe transport of those Dangerous Goods.

Who is the course for?

This is a specialist course to ensure that all critical staff who are engaged in the supply, distribution, and waste management of critical medical products are fully aware of the instructions for packing, handling, and shipping of patient specimens and medical waste. The requirements for the management and handling of "Infectious Substances" are very specific and this course will ensure your team is fully briefed. The course is available either online or as an interactive webinar that covers in detail the requirements for both ground and air transport and also includes essential safety and hygiene recommendations.
