

Safety Management Systems Overview and Recurrent Workshop – 2 Days

Introduction

Periodically we should consider our Safety Management Systems in a more Holistic way to consider whether it is delivering the optimum benefit for our organisation.

Do you know the primary reason for Aviation Safety Management System "Failure" (Fail is a hard word – maybe abject under performance is more appropriate!)

Aviation Safety Management Systems under perform because the Safety Manager is trying to implement "His" SMS and not the SMS which is driven by the core management team. (Unfortunately this is much misunderstood and reoccurs multiple times).

Often the Accountable Manage does not take sufficient ownership of the SMS Program. This may be compounded by the fact that the core management team does not understand sufficiently the SMS and "relies" on the SMS Manager to do "the" Job. (but he cannot for multiple reasons and this is the "catch 22")

This 2 day course aims to provide a comprehensive review of the overall effectiveness of our SMS. Delegates will undertake an overall review of SMS best practice and together with the regulatory driven obligations will perform a GAP analysis against their own organisation system.

The course is extremely intensive highly practical, and promotes best industry practices. It is an industry specific two-day program specifically designed for those who need to engage with a full understanding and manage, or deliver specific guidance within their own organisations.

The course is a highly participative and stimulates involvement and provides for powerful motivation.

Extensive use is made of group exercises, workshop activities, case studies and feedback.
