

Aircraft Leaseholder & Maintenance Reserve Insurance Considerations – Essentials – 1 Day

Introduction

This one-day course provides essential insights into the fundamental aspects of aircraft leasing and the critical role of insurance. It covers key terms and definitions, the importance of insurance in aviation, and strategies to mitigate risks and manage claims efficiently.

The attendees will gain valuable insights into cost-benefit analysis for aviation insurance, and address common questions regarding certificates of insurance in aircraft leasing. The course will also cover the fundamentals of insurance risk management, particularly focusing on aircraft hull insurance exposure and leaseholder obligations.

Who is the course for?

This course is ideal for aviation professionals, including leaseholders, insurers, and risk managers, who need to deepen their understanding of aircraft leasing and insurance considerations. It's also suitable for those involved in financial and operational aspects of aviation who seek to optimize their risk management practices.

What is the Benefit of this Training – What will I learn?

- a) Get to grips with the essential aircraft insurance coverage requirements and regulatory obligations, ensuring you comply with Regulation (EC) No 785/2004.
- b) Build your skills in managing insurance risks, particularly focusing on aircraft hull insurance exposure and the responsibilities of leaseholders.
- c) Learn how to perform cost-benefit analyses for aviation insurance, helping you make well-informed financial decisions.
- d) Master the process of determining the value of a commercial aircraft for insurance purposes.
- e) Discover strategies to seamlessly integrate aircraft insurance with maintenance reserves, boosting overall operational efficiency within aviation organizations.
