

Continuous Airworthiness Management for Large A/C – 2 Days

Introduction

This course is designed for individuals involved in overseeing and managing large aircraft within a Continuing Airworthiness Management Organization (CAMO). It is particularly beneficial for those who are or aspire to become Continuing Airworthiness Managers. Key responsibilities covered in the course include managing Continuing Airworthiness, optimizing maintenance programs, and implementing an effective Reliability Program.

Participants will also gain insights into detailed work planning, scheduling, budget control, inventory management, subcontract coordination, and safety-critical task planning. Additionally, the course addresses coordination with production planning and the management of approved data.

The program provides a comprehensive, practical understanding of EASA regulations relevant to the Part M environment. It explores maintenance organization responsibilities, contracted arrangements, and organizational compliance with Part M, including different approaches to managing the Airworthiness Review Certificate process. Engaging and highly practical, this course encourages active participation to ensure a thorough and stimulating learning experience.

What is the Benefit of this Training – What will I learn?

- a) Achieve a solid understanding related to the role of Continued Airworthiness Management (CAM)
- b) Able to engage in a more practical way with Part M Functionality and to avoid or mitigate problems
- c) Able to use the regulation to proactively manage the Continuing Airworthiness (CA) of your aircraft
- d) Understand the activities which support the analysis of Safety Data including SBs and Ads
- e) Understand the purpose of STCs and how they are integrated into the maintenance Program
- f) Understand the roles and responsibilities within the various CAMO groups including Reliability, Technical Records, Engineering, & Maintenance Planning

Who is the course for?

This course is designed for professionals involved in the technical management of Commercial Aircraft Maintenance (CAMO). It is ideal for those handling Airworthiness Review Certificates (ARC), Technical Engineering, Maintenance Planning, CAMO Quality Auditing, Reliability, and Technical Records. Additionally, it benefits anyone seeking to establish an effective interface with an EASA-compliant Maintenance Department.

Detailed Content / Topics - The following Subjects will be addressed

Day 1

Introduction
Abbreviations & Definitions
Basic Introduction to EASA Regulations
EASA Part 145 Overview
Design Aspects of Airworthiness
Contract & Subcontract Management
Organizations Approval Ratings
SMS Considerations related to EASA Part CAMO
Managing Competencies in a Part M Environment
Part M Subpart B – Accountability

Day 2

Part M Subpart C – Continuing Airworthiness
The Aircraft Maintenance Program AMP Introduction
Airworthiness Limitations & Certification Maintenance Tasks
General Introduction to all Part 21 Subparts
Supplemental Type Certificates (STC)
ETSO Introduction
Modifications & Repair Status Considerations
EASA Compliant AMP Review of Critical Items

Target Groups

This course is designed for CAMO Managers, Continuing Airworthiness Managers, Technical and Engineering Managers, Maintenance Planning and Reliability Managers, and CAMO Quality Auditors. It is also valuable for anyone seeking to develop a strong working relationship with an EASA-compliant Maintenance Department.

Pre-requisites

A background in an aviation airworthiness environment.

Learning Objectives

The course introduces the delegates to the Regulatory Background, Roles & Responsibilities associated with the Continuing Airworthiness Management of Large Aircraft.

What do People Say about Sofema Aviation Services Training?

*"I found satisfying answers to all my questions."
"The instructor demonstrated very deep knowledge of the subject."
"The content was really effective, I gained a lot of new knowledge."
"The practical examples were perfectly delivered."*

Duration

2 days – Start at 09.00 and finish at 17.00, with appropriate refreshment breaks.
